

User Group Meetings & Workshops

Tuesday, December, 9, 6:30pm-8:30pm

Applied Materials

AutoMod Update: AutoMod was introduced as the first 3-D simulation product 25 years ago. Since then, it has evolved into the most powerful and flexible simulation tool on the market, with detailed material handling templates. We continue to invest in AutoMod development. This presentation will discuss the current AutoMod roadmap and present newly implemented features in the AutoMod 12.2 release. The forum will be open, and comments will be welcome regarding future product enhancements. This is your chance to have your questions answered by presenter Todd LeBaron and the AutoMod team.

Emulate3D Ltd.

Emulate3D Ltd. helps companies increase sales and reduce the cost of installing automation. Demo3D provides rapid and realistic modeling of automation systems, helping sell your ideas to stakeholders at all levels. With Emulate3D Controls Testing, companies take controls validation off the critical path, reducing project cost and accelerating ramp.

Frontline Systems, Inc.

Risk Analysis, Simulation Optimization, Robust Optimization and More, presented by Daniel H. Fylstra, President

See how you can easily analyze risk, run multiple parameterized simulations, and find optimal solutions for uncertain models in Microsoft Excel, with Risk Solver Platform – Frontline Systems' new integrated product with best-of-breed Monte Carlo simulation, best-of-breed conventional optimization, and deep support for simulation optimization, stochastic programming and robust optimization methods.

Imagine That, Inc.

Join us at the ExtendSim User group meeting sponsored by Imagine That Inc. Be inspired by the innovative plans for ExtendSim 8 including tools for scenario management and more. Plus, make your own suggestions for future releases. Take the shortcut to success... ExtendSim - Power Tools for Simulation.

Rockwell Automation

Bring your laptop and learn techniques in managing data both in and out of Arena. This free session will introduce some of the new data import features of Arena, in addition to other techniques via Visual Basic.

Siemens PLM Software

Join us and learn why companies such as BMW, VW, Daimler, Caterpillar, P&G and others all use Plant Simulation. We will use a live demonstration to highlight the optimization capabilities of Plant Simulation, including some of the latest features of version 9.0, and show you the value of 3D visualization.

Systems Navigator

Scenario Navigator software allows organizations to deploy simulation models as operational decision support systems. Scenario Navigator works with most commercial simulation software packages such as Arena, Automod, Enterprise Dynamics, ExtendSim, Plant Simulation and Simul8. During the user group meeting we would like to have an open discussion with all simulation professionals about future functionalities for Scenario Navigator.

XJ Technologies

AnyLogic - Professional Tool for Multi-Method Simulation Modeling, presented by Andrei Borshchev, CEO & Managing Director, andrei@xjtek.com

AnyLogic is the first and only simulation tool that supports system dynamics, process-centric (discrete event), and agent-based methods within one modeling language and one model development environment. We will demo several AnyLogic models and show how the user can benefit from using different modeling methods, and from agent-based modeling in particular. During the demonstration new AnyLogic 6.4 will be presented.
